

What would you do in the event your athlete goes missing?

In less than 5 minutes you can create a safety net for your athlete on the Safe@Allstar mobile app to send real time alerts if your child is missing at an event. The Safe@Allstar mobile app utilizes crowd-sourcing technology to alert the masses to quickly locate an athlete. This is a FREE benefit of USASF Membership. Follow the steps below:

Download
Safe@Allstar
from Apple
Store or
google play

Register on
the app
(must use
USASF email)

Create
athlete
profile

Assign "friends"
(other users who
can send alerts
on your athletes
behalf) **optional**

Familiarize
yourself with
the ALERT
functions

Tell others!

The more
users on the
app the safer
we all are!

How does it work?

In the event a child is missing, the owner or assigned friends of an athlete profile can send either a **Yellow alert** (sent to assigned friends only) or a **RED alert** (sent to the entire Safe@Allstar mobile platform - used in true emergencies only) requesting assistance locating the athlete which includes photos and detailed description of athlete enabling the entire crowd at an event to immediately try to locate the athlete.
