

SAFE @ ALLSTAR

CIRCLE OF SAFETY

Safe at All Star has developed a multi-layered child protection program that provides personalized training, education, and resources to help protect athletes and create environments that encourage safety, openness, and disclosure.

This model will educate, empower, and enhance self-awareness among athletes, parents, coaches, owners, and event producers.

Simply put, Safe at All Star provides FREE training that is relevant to each USASF member.

MOBILE SAFETY APP

The Safe@AllStar mobile app leverages technology that combats active risks by providing immediate reporting, response, and recovery capabilities.

The Safe@AllStar app allows parents to create a safety profile for their athlete, enabling professionals to provide athlete identification and utilize crowd-sourcing technology in the event a child is missing.
